# No Break Guarantee

Neta's garden watering products have been developed for **Australian & New Zealand** gardeners. As a commitment of quality, Neta has introduced the **Neta No Break Guarantee**. This guarantee is our pledge that if our products do not perform to expectations within the guarantee period stated on the packaging, Neta will replace or refund the product.

Neta No Break Guarantees are clearly identified on each product pack and range anywhere from 2 through to 30 years - depending on the individual product:

- Sprinklers are covered by a 2 year guarantee.
- Retractable hose reels are covered by a 3 year guarantee.
- Plastic UV stabilised fittings are covered by a 5 year guarantee.
- Plastic & metal guns are covered by a 5 year guarantee.
- Brass hose fittings & brass nozzles are covered by a 20 year guarantee.
- Neta's garden hose range guarantees varies between 6 to 30 years.

However, as guarantees differ from product to product, please refer to the original packaging for confirmation. Please also see **About Neta Warranties** page at [www.netagarden.com](http://www.netagarden.com)

# Garden Hose

**An Iconic Hose.** Since the 1940's Neta has been synonymous with **high quality garden products**. Neta hoses are manufactured and tested to an exacting standard; AS2620.1. Engineered for improved **softness, flexibility** and **kink resistance**, all are **ultra lightweight**, making them easy to use. There is a Neta hose to suit each and every gardener and their garden.

## What makes a Neta hose stronger and more durable?

This starts right at the point of manufacture with the use of high quality raw materials. Its basic structure, which comprises an inner tube, a woven casing and an outer tube, also determines its quality. The thicker the tube, the stronger the hose will be and the more it will resist kinking. Strong polyester yarn, neatly and evenly braided, reinforces your Neta hose, allowing it to withstand high water pressure. The outer layer has high UV resistance to withstand the harsh Australian sun.

### Platinum KAT | 30 Year Guarantee

The Platinum KAT features six layers of lead free premium materials, featuring both a braided and knitted layer for extra strength and flexibility. The Platinum KAT is perfect for the modern Australian & New Zealand gardener with a stylish platinum grey matte finish.

The Platinum KAT is confidently backed by Neta's 30 year *No Break Guarantee*, designed to be durable and tough and created using UV stabilised materials to withstand harsh weather conditions, accompanied by the highest ten star kink resistance rating.

1. The inner layer is moulded using high quality white PVC.
2. Second layer of high quality flexible black PVC.
3. Reinforced braided polyester layer.
4. Middle layer of high quality flexible black PVC.
5. Reinforced knitted polyester layer.
6. Soft touch metallised transparent grey layer with soft finish.

# Garden Hose 18mm

## Jade Garden Hose

- 6 Year Guarantee
- 5/10 Kink Rating
- Braided Double Layer Construction

## Fire Hose

PRODUCT SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY	BARCODE
20mm x 20m <b>Fitted</b>	GH/NFHB20020	967475801	1	1	9 314212 465771

20mm x 36m <b>Fitted</b>	GH/NFHB20036	967475901	1	1	9 314212 465658
--------------------------	--------------	-----------	---	---	-----------------

- A heavy duty reinforced hose with excellent flexibility and high abrasion resistance.
- Suited for hand-held fire fighting\*
- Supplied with brass click-on fittings and a fire-fighting spray nozzle.
- Made from UV stabilised materials for long life and is quality guaranteed for 5 years.
- The hose complies with Australian standard AS/NZS1221 with a minimum flow rate of 0.45 litres/second at 150kPa.
- A maximum operating pressure of 1000kPa and a burst pressure of 4000kPa.

*\*Intended for use as a general (domestic) rural fire hose. Not to be used as a replacement for fixed fire hose reels governed by regulatory authorities*

## Drinking Water Hose

12mm x 10m	GH/NDW012010	967475601	7	7	9 314212 465382
------------	--------------	-----------	---	---	-----------------

12mm x 20m	GH/NDW012020	967475701	5	5	9 314212 465399
------------	--------------	-----------	---	---	-----------------

- A strong, reinforced and braided hose, ideal for caravans, boats, or anywhere that requires safe transfer of drinking water.
- Made from UV stabilised materials and guaranteed for 6 years.
- Tested to comply with Australian Standard AS/NZS4020 to ensure non-toxic, safer and cleaner hose:
  - No plastic taste
  - Made with food grade materials and suitable for use with drinking water
  - Multiple applications
  - Durable construction
- Pressure rated at PN12.5 to suit temporary connection to mains water supply.
- Compatible with standard 12mm Garden Hose fittings,. The hose comes wrapped in plastic to ensure it is clean when sold.

*Drinking water hose is designed for use with cold water. We do not recommend using this hose with water exceeding 38°C.*

## Stowaway Compact Hose

- A durable 8mm braided hose with Multi-Pattern Spray Gun. Ideal for small balconies, courtyards or even the boat.
- Fittings suitable for both 3/4" and 1" outlet taps.
- Individually shrinkwrapped.

8mm x 10m - RR Box	GH/N010CHR01	967475201	6	6	9 314212 465887
--------------------	--------------	-----------	---	---	-----------------

# Special Purpose Hose

## Sprinkler Hose

- A unique 'flat' profile hose with twin stripes to clearly show which side is up. The hole pattern is designed to ensure even spray coverage.
- Sprinkler hose supplied fitted with stake to hold the end in place, and with an end cap to flush the hose or for joining two sprinkler hoses together.
- The fittings are fully compatible with standard 13mm micro irrigation fittings. Also available with reel for fast, tangle-free, convenient and compact storage.
- Easy to lay out and wind up. No more tangles or twists.
- Made from UV stabilised materials.
- For extension use 3/4 inch FBSP hose connector 12mm (967573701).

## Clear Vinyl Tube Bulk - for cutting to length in store

- General purpose, transparent tube, made from food grade material.
- Suitable for a wide range of applications including:
  - low pressure delivery
  - syphon and drainage lines
  - builders water level
  - cable or chain protection
  - fish tank tube
  - water level sight tube
  - protective covers
- Bulk spools and coils provide a simple and convenient system for retailing "cut to length" CVT.
- Handy metre marks and the tube diameter are printed every metre along the full length of the tube. The metre mark counts down to show how much tube is left on the spool.

# 12mm Plastic Garden Hose Fittings

Neta's range of plastic hose end fittings is proudly **designed & made in Australia** to high quality standards. The fittings are manufactured from **UV Stabilised** plastic which make them ideal for the harsh Australian & New Zealand outdoors. As an assurance of quality, all fittings are backed by a **Neta No Break 5 Year Guarantee**.

The fittings have been designed to be robust and functional. The one-piece hose **connection grip** ensures the assembly is **water tight**. The range offers a complete watering solution: **from tap to hose end** and includes fittings to suit different tap sizes and hose diameters.

## Tap Adaptor

Connect to a 1" or 3/4" tap.

## Hose Connector

Connect 12mm hose to a tap.

Also available as a 12/18mm suitable for a 12mm click-on fitting and a 18mm hose.

## Hose Joiner

Join two 12mm hoses or repair a 12mm split hose.

## Hose Coupler

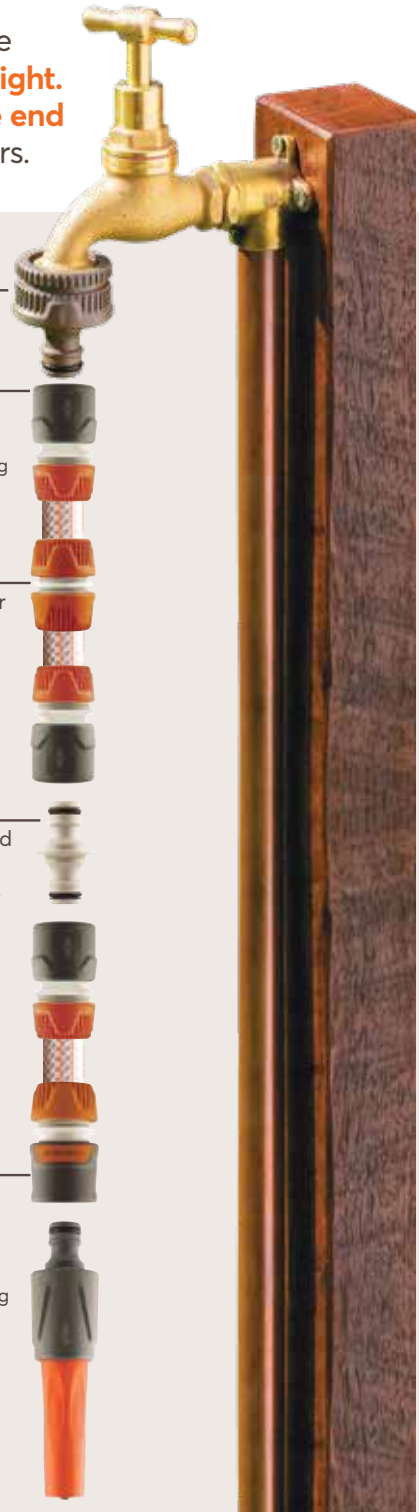

Join two 12mm hoses to extend length.

Also available as a 3-end coupler.

## Water Stop

Change watering accessories over quickly without getting wet.

Also available as a 12/18mm suitable for a 12mm click-on fitting and a 18mm hose.

## 18mm Plastic Garden Hose Fittings

Neta 18mm plastic garden hose fittings are manufactured using **UV stabilised** plastic and **guaranteed for 5 years**. Coupled with an 18mm hose it is an ideal watering solution where a **higher water flow** is required, for example on rural or acreage properties.

### Features & Benefits

- Available in adaptors, connectors, watering sets, joiners and couplers
- 5 year No Break Guarantee
- Available in 18mm click-on range fittings
- Made from UV stabilised materials
- Screws onto standard 3/4" and 1" tap outlets
- Large easy grip winged nut
- Features Neta's 'Long Claw' grip ring

### Neta Long Claw Acetal grip ring high pressure anti-leak sealing system

The *Long Claw* is Neta's secret for high water flow applications. It's separate to the rest of the fitting, allowing it to really dig its claws into the hose to create a connection that won't break or leak.

When combined with a Neta hose it gives the ultimate connection and protection against leaks - all part of our anti-leak sealing system. The Neta *Long Claw* grip ring is available in 18mm plastic and brass connectors and joiners.

### Long Claw Grip Ring Assembly

#### Wings

Large easy-grip wing nut

#### Seals

Quality anti-leak washer and o-ring

#### Click-on

Large nylon grip teeth inside

#### Hose Tail

Extra long hose tail

#### Long Claw

*Long Claw* for extra grip  
Made from strong acetal

#### Nut

Easy grip nut

## Sprinklers

Neta has an extensive range of high performance sprinklers to suit many different applications. Neta uses **UV stabilised plastic** and tough, **durable metal** to ensure a long product life and the ability to withstand harsh **Australian & New Zealand conditions**. There is a Neta sprinkler for every garden application, all of which give gardeners a uniform coverage when watering.

### Neta offers a variety of options for sprinklers

- ✓ Metal or plastic
- ✓ Built-in or separate base
- ✓ Base style – wheels, spike or high legs
- ✓ Diverse range of coverage areas
- ✓ Pattern – round, fan, adjustable round, rectangular or adjustable rectangular
- ✓ Adjustable pattern versus a fixed pattern
- ✓ See the pattern selection guide below for easy selection of garden sprinklers.

# Mechanical & Electronic Tap Timers

Neta's tap timers range is designed to **save time & water**. Set a time to deliver the correct amount of water at the best time of day to avoid over watering or watering outside allocated times. Automating watering saves customers time from hand watering. Made from **UV stabilised** materials, Neta's tap timers are suited to the harsh Australian and New Zealand outdoors.

## Neta's tap timers are designed to meet consumer needs.

- User-friendly with large programming interface
- Flexible: use for one and two water zones
- Automatic operation of mobile sprinklers, irrigation & misting systems

### Mechanical Tap Timers

- Runtime up to two hours
- Large rubber non-slip rotary programming dial
- Bypass function for manual watering

### Electronic Tap Timers

- Large LCD display & non-slip rubber button
- 11 predefined programs for flexible programming
- Bypass function for manual watering
- Rain Delay function
- Battery indicator

In the event of predicted rainfall, the Rain Delay function can be set to delay programmed watering up to 7 days.

- Maximum operating pressure 800 kPa.
- Requires 2 x AA alkaline batteries (not included).

# Hose Hangers, Reels & Trolleys

Hose hangers, reels & trolleys are great for keeping hoses neat & make them **safer & easier to use**. Neta has a hose storage device to **suit every budget**, from simple hose hangers to heavy-duty reels and a trolley for transporting heavy hoses around large gardens. Careful storage reduces the risk of kinking and knotting and will keep garden hoses **performing well** for many more years.

## Hose Hangers

Hose hangers are the most basic storage system. They require a bit more effort than a reel, but are an excellent option for the budget-conscious home owner. Neta offers a range of hose hanger colours from the aluminium to UV stabilised plastic.

Aluminium hose hangers can also be used for hanging ladders, tools or bicycles. Neta also has a range of plastic hose hangers that incorporate storage for sprinklers and guns.

## Hose Reels and Trolleys

Hose reels and trolleys are the ultimate storage device. They are easy to use and keep the hose twist-free which prevents kinking. Neta's 12mm hose reels are made from light-weight, corrosion-free aluminium and UV stabilised plastics.

Hose trolleys allow for the movement of hose anywhere in the garden and allow for storage of hose when not in use. Neta reels and trolleys require some assembly and come with instructions for setup.

# Hose Hangers, Reels & Trolleys

## Plastic & Aluminium Hose Hangers

### PLASTIC HOSE HANGER

- Can be easily fixed to walls, fences or posts, for tidy storage of garden hoses.
- Sprinklers or guns can be hung from storage slots under hanger.
- Made from UV Stable materials.
- Holds up to 30m of 12mm hose.
- Requires 8 gauge screws (not included).

### HOSE REEL CONNECTOR SET 12MM PLASTIC

- Convenient method for connecting a hose reel to a tap.
- Includes 1.5m of quality hose and two Neta plastic 12mm click-on hose connectors.

Sleeve	MH/GA0P00HRC	967571601	4	4	9 314212 015396
--------	--------------	-----------	---	---	-----------------

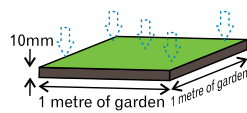

## Rain Gauges

Rain gauges provide the ability to determine how much extra water a garden actually needs to supplement rainfall and to avoid over watering. Neta's rain gauges **are easy to install & read** and the professional rain gauge includes a rainfall recording chart. There is a rain gauge to suit customer's **budget and level of expertise**.

Looking at nature as a guide, 10mm of rainfall is considered good for the garden in most areas. Rainfall of 10mm is the same as 10 litres of water spread evenly over a square metre of garden.

The table below shows how much water to use on various areas to equal 10mm of rainfall.

Area	1m <sup>2</sup>	2m <sup>2</sup>	5m <sup>2</sup>	10m <sup>2</sup>	20m <sup>2</sup>
Litres	10	20	50	100	200

A comprehensive range of hoses and adaptors are available to connect to existing rainwater piping.

### EASY RAIN GAUGE - 120MM

- Plastic rain gauge can be mounted on walls, posts or placed into the ground with a spike.
- Measures up to 120mm of rainfall. Perfect accessory for any garden.

### BACKYARD RAIN GAUGE - 150MM

- Tapered gauge for accurate measuring of low rainfall.
- Measures up to 150mm of rainfall.
- Supplied with stainless steel screws and rainfall chart.

### PROFESSIONAL RAIN GAUGE - 250MM

- Small diameter inner cylinder for accuracy.
- Large outer cylinder for increased capacity.
- Measures up to 250mm of rainfall.
- Supplied with stainless steel screws and rainfall chart.

# Irrigation

---

## Garden Irrigation

An irrigation system is the **best way to maximise water efficiency** and still **maintain a healthy garden**. A Neta irrigation system assists customers in building a custom irrigation system that ensures **each area of the garden gets the right amount of water**. Neta's Retail Ready system makes it easy for your customers to select components and simple for retailers to order, display and carry an extensive range of garden irrigation fittings.

### Features & Benefits

- Manufactured from quality UV stabilised plastics.
- Scalable: 'add-on' system – customers can start small and add to it as required.
- Individual components are low in cost, so the home gardener can start small and improve their system over time.
- Neta has a comprehensive range of fittings, drippers, sprinklers, sprays & stakes.

The time and money spent in the initial setup will be rewarded by the **time and money saved** by having an efficient system in place.

An irrigation system can be **automated** to further enhance its convenience. When programmed, it will quietly turn itself on and off whenever the garden needs water and allows gardeners to get on with other jobs.

Watering gardens at the right time of day, early morning or evening, reduces water loss through evaporation. Blustery weather will also lead to water loss, so avoid windy conditions, or install a drip system. Controlling outdoor water usage can be easy by installing a manual or electronic tap timer, allowing you to control when and how much to water.

# Efficient Irrigation

## Tips for Water Efficient Irrigation

Always overlap sprays & sprinklers spray patterns evenly to ensure consistent water coverage.

Make sure that sprays, sprinklers & drippers do not water unnecessary areas including paths or building areas.

Use a Neta mechanical or electronic tap timer to control the time and the amount of water used for a water efficient garden.

Mulch garden beds and choose drippers to water the root zone directly and reduce water evaporation.

Give lawns a good soaking two to three times per week, rather than a light daily watering.

It is best to water at dusk or dawn to reduce water evaporation and maximise the amount of water that reaches the plants root zone.

Don't mix drippers (suitable for low pressure) with sprinklers or sprays on the same line as they have different flow rates.

Don't use too many drippers or sprays on one line as this will reduce performance.

Ensure your water supply has enough capacity to support your sprays or drippers. Check your water flow rate from the water supply using the 9L bucket test (Neta Irrigation Planner).

**See our  
Irrigation  
Planner**

# A Neta Retail Solution

## Retail Ready

### The Four Easies

#### Easy to Order

Neta's Retail Ready range is designed to make it simple for you or your staff to order. Each pack features a scannable barcode and quantities on the front of the box to ensure you get the right product when you place your order.

#### Easy to Open

Neta's Retail Ready packaging makes it easier and quicker for you to stock or replenish your in-store displays. Our packaging allows easy opening without the aid of tools such as knives—just tear along the clearly marked perforations to reveal a neat shelf-ready unit. The discarded lid and box are recyclable.

#### Easy to Shelf

Neta's Retail Ready range gives you a quicker, faster, simpler and neater solution than decanting individual products and messy displays. When you receive your Retail Ready packs you simply open the pack and place it on the shelf—no shelf labels required, all the information is on the box label. Our Retail Ready range is modular, so takes less valuable shelf space than our competitors packaging and creates an eye-catching layout.

#### Easy to Shop

Neta's Retail Ready range eliminates purchase barriers. Our packaging allows the customer to easily self-select the product and variant with ease, increasing sales.

### Neta's Free Irrigation Planner

#### For the retailer

- **Increases sales** - easy for customers to identify & choose products.
- **Easy to display** - supplied in a ready retail box.
- **Free-of-charge** - delivered with order.

#### For the customer

- Helps to create a care-free irrigation system.
- Assists to choose the right product for each application.

**Free** printed Irrigation Planners in-store. Order now!

To order your starter kit, which consists of a Retail Ready box and 2 packs of brochures, add the **order code 588318101** to your next order. Re-ordering is simple, just scan the re order code on the box and a fresh box with 50 brochures will be dispatched with your next order.

# Irrigation At a Glance

Product Group	Product Options	Product Features & Uses
Riser tube	LDPE	General purpose tube suited to 4mm threaded fittings
	PVC	Flexible tube used for tight corners & suited to 4mm barb fittings
GardenDrip	25m, 50m & 100m	Brown LDPE pipe with drippers every 30cm Retail packaging contains helpful design information
Irrigation fittings	The most comprehensive range of barbed and threaded, nut and tails, joiners, tees, elbows and valves	Stores can supply whatever the customer needs
Micro sprays & sprinklers	Range of different fixed or adjustable spray patterns	Fixed and adjustable coverage Colour coded for flow rate options
Drippers	Fixed output	Fixed and adjustable outputs Base options - barbed, threaded or complete with stake Pressure compensation and non-pressure compensation drinker options
	Adjustable output	
	Barbed base	
	Threaded base	
	Complete with stake	
	Pressure compensating	
	Non-pressure compensating	
Stakes	Wide range of stake options	Useful for anchoring irrigation pipe to garden beds Connect and support riser tube to irrigation supply pipe Support sprays, sprinklers and drippers away from the irrigation pipe and above foliage
Accessories	Filters	Stores can tailor their offering to provide an extensive system that will suit their customers requirements.
	Pressure reducers	
	Tub outlets	
	Cable ties	

Fittings designed to be used with low density poly pipe supply lines with max Operating Pressure 300kPa. Water temperature should not exceed 35°C\*. \*Higher water temperatures reduce kPa.

## Flexible PVC Riser Tube

- Suited to 4mm **barbed fittings**.
- Flexible riser tube is more flexible than riser tube, and therefore more suited to sharp bends or colder weather.
- Use for connecting micro irrigation stakes, sprinklers and drippers located away from the main poly pipe line.

PRODUCT SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY	BARCODE

# Drip Line

## GardenDrip

	PRODUCT SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY	BARCODE
	4Lph					
	13mm x 25m	MD/GD1340A30	967385701	5	5	
	13mm x 50m	MD/GD1340030	967385601	5	5	
	13mm x 100m	MD/GD1340B30	967385801	1	-	

### Environmentally Friendly

- Conserves water: helps use water wisely in narrow garden beds and large landscaped areas
- Delivers measured amounts of water directly to the root zone
- Regular dripper spacings ensure an even application of water to the strip of soil being irrigated
- Promotes deep root growth for tough, resilient gardens
- Minimises evaporation and prevents water being blown away in the wind

### Easy to Use

- Drippers pre-installed at 30cm set spacings
- Anti block drippers

### Easy to Install

- Works best under a light covering of mulch
- Fully compatible with standard 13mm micro irrigation fittings

LITRES PER HOUR (NOMINAL)	OPERATION PRESSURE
4Lph	100 KPa

## Stake & Micro Sprinkler Sets

**RISER JET STAKE SET  
TUBE & 360° MICRO  
SPRINKLER (BLUE)**

Riser jet stakes assembled with tube and a micro sprinkler.

Stake Length = 310mm  
Tube Length = 600mm  
Radius = 3.2m  
Flow Rate = 45Lph  
@150kPa

Bulk	MF/STR04TR10	967370301	10	60	9 314212 075086
------	--------------	-----------	----	----	-----------------

**RISER JET STAKE SET  
TUBE & 360° MICRO  
SPRINKLER (GREEN)**

Riser jet stakes assembled with tube micro sprinkler.

Stake Length = 310mm  
Tube Length = 600mm  
Radius = 3.5m  
Flow Rate = 72Lph @150kPa

Bulk	MF/STR04TR13	967370401	10	60	9 314212 073266
------	--------------	-----------	----	----	-----------------

**RISER JET STAKE SET  
TUBE & 360° MICRO  
SPRINKLER (RED)**

Stake Length = 310mm  
Tube Length = 600mm  
Radius = 3.7m  
Flow Rate = 90Lph @150kPa

Bulk	MF/STR04TR15	967370501	10	60	9 314212 075093
------	--------------	-----------	----	----	-----------------

Adjustable spray jets produce a fountain-like spray, adjusted by turning the body. Screws into rigid risers or poly pipe.

## Micro Spray Jets

### 360° SPRAY JET ADJUSTABLE 4MM THREAD

Radius = 0 - 1.8m  
Flow Rate = 0-45Lph  
@150kPa

PACK TYPE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY	BARCODE

------	--------------	-----------	----	-----	-----------------

## Mister

### 360° YELLOW BASE MISTER

Fine mist spray suitable for delicate seedlings and ferns for use in nurseries. Screws into rigid risers or directly into poly pipe.

Radius = 0-5m  
Flow Rate = 29Lph  
@150kPa

10/Consumer Pack - RR Box	MR/RRJMA0000	967381301	20	240	9 314212 116420
Bulk	MF/JMA000005	967379001	100	1800	9 314212 075598

## Micro Spray Stakes

### 360° SPRAY JET STAKE ADJUSTABLE

Produces a fountain-like spray, adjusted by turning the body.

Stake Length = 135mm

Radius = 0 - 1.8m  
Flow Rate = 0- 45Lph  
@150kPa

5/Consumer Pack - RR Box	MR/RRSSJS436	967470201	10	80	9 314212 116925
Bulk	MF/SSJS04360	967495201	20	600	9 314212 076632

#### Performance - Fully Open 22 clicks

Pressure (kPa)	Flow(Lph)	Radius(m)
100	64	1.4
150	78	1.8
200	90	2.0

### SPRAY STAKE

Used in pot plants & planters. Push 3mm tube onto top end of stake to create spray pattern. Stake Length = 115mm

Radius = 1.0m  
Flow Rate = 52Lph @150kPa

Bulk	MF/STS003180	967390601	50	3000	9 314212 073037
------	--------------	-----------	----	------	-----------------

# Sprays & Sprinklers

## Mini Sprinklers - Rotor Rain

The *Rotor Rain* is a professional sprinkler suitable for large garden landscapes. It can be fitted to either the mini sprinkler stake or threaded poly prop risers.

### 3/8" BSP THREAD GREEN - 1.5MM NOZZLE

Radius = 4.3m  
Flow Rate = 94Lph @150kPa

------	--------------	-----------	----	-----	-----------------

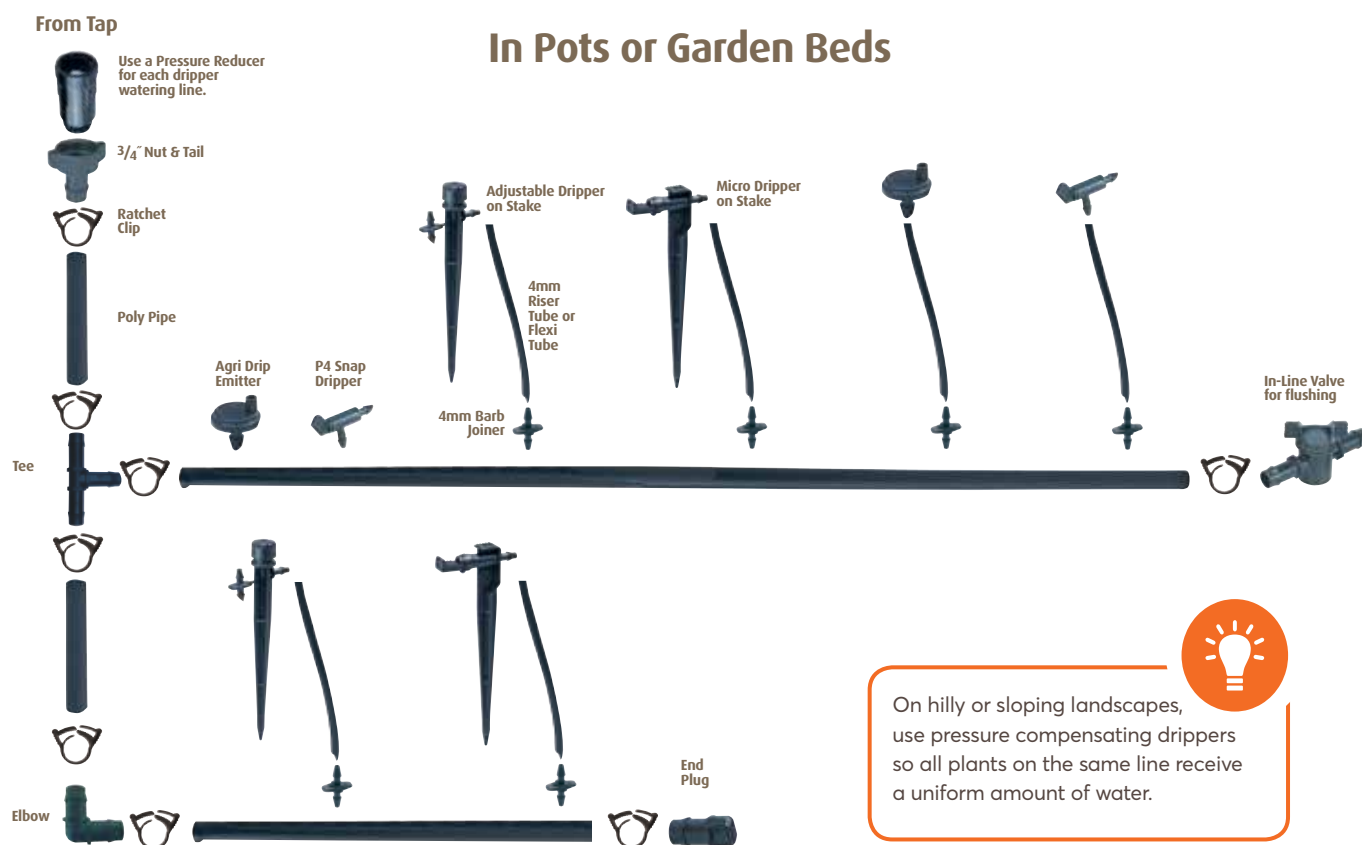

Drippers are most commonly used for watering individual plants at ground level, which promotes a strong root system. Drippers suit low water pressure applications and are ideal in windy environments. Drippers are available as adjustable or fixed flow rate.

# Drippers

nēta

On hilly or sloping landscapes, use pressure compensating drippers so all plants on the same line receive a uniform amount of water.

# Drippers

## Drippers - 360° Adjustable Flow Drippers

The 360° adjustable flow drippers can be adjusted to allow precise water distribution in a tight circular pattern.

### 360° ADJUSTABLE DRIPPER - 4MM BARB

## Drippers - 2 Piece Snap Drippers

### 4LPH P4 SNAP DRIPPER

Two part dripper that can be easily separated for cleaning.

10/Consumer Pack - RR Box	MR/RRDAQ0000	967484101	15	120	9 314212 116253
Bulk	MF/DAQ000004	967494801	50	2000	9 314212 076731

### 4LPH MIDI DRIP EMITTER ON STAKE

Two part dripper that can be easily separated for cleaning. The stake ensures the dripper remains in place. Stake Length = 120mm.

5/Consumer Pack - RR Box	MR/RRDMD4SP0	967484201	10	80	9 314212 116260
Bulk	MF/DMD4SP000	967467901	20	1000	9 314212 076816

Extend watering coverage and ensure a tidy irrigation system by using stakes and risers. Anchor irrigation pipe can be used in garden beds to connect and support riser tube to irrigation pipe. Also used to support sprays, sprinklers and drippers when installed away from the irrigation pipe.

# Stakes & Risers

nēta

Rigid risers are available in 4 sizes: 200mm, 300mm, 400mm & 450mm to suit the height of the plant.

Use a 400mm or 450mm riser to water above seedlings and when the plant is mature trim the riser back to water under the foliage.

## Rigid Riser Stake

- Holds rigid risers in place
- Easily moved around garden

## Rigid Pipe Stake

- Holds poly pipe in place
- Supports rigid risers

## Riser Jet Stake

- Multi functional
- Attaches sprays & sprinklers to 4mm tube

## Mini Sprinkler Stake

- For micro sprinkler and rotor rain sprinklers
- Suits large landscape areas

## Pot Stake

- Supports drippers
- Use with pot plants

## 200mm Rigid Riser

- Water above young plants
- Water under advanced plants

## 300mm Rigid Riser

- General purpose
- Water advanced plants

## 400mm & 450mm Rigid Riser

- Extra height
- Suits large garden areas

## Stakes & Risers - for Micro Jets & Micro Sprinklers

### 200MM RIGID RISER WITH ADAPTOR

Rigid Risers are used to elevate sprinklers and sprays above ground level for maximum coverage. Screws directly into poly pipe.

------	--------------	-----------	----	------	-----------------

### WEED MAT STAKE

A universal stake that was developed to hold down weed matting and plastic sheet in plantations that have adopted an environmental alternative to pesticide.

Stake Length = 130mm

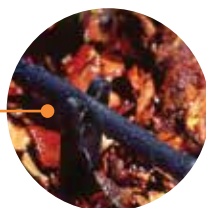

Bulk	MF/STH125020	967468101	20	400	9 314212 071019
------	--------------	-----------	----	-----	-----------------

Choose between micro sprays, misters or drippers to water individual pots or baskets. Misters are perfect for irrigating greenhouses or creating misty humid environments for tropical plants.

# Pots & Baskets

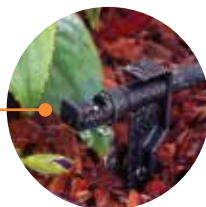

## Pot Stake

Used to secure drippers in pots and gardens.

Install rigid risers upside down with a mister or spray to water hanging baskets effectively.

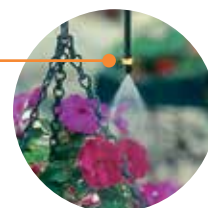

This also has the benefit of a cooling effect on patios.

## Midi Drip Emitter

Two part dripper that can be easily separated for cleaning. Stake ensures dripper remains in place.

Perfect for pots - simply run riser tube from the main poly pipe line and attach dripper.

## Mister

For a fine mist spray suitable to water seedlings or ferns and perfect to use above hanging baskets. Screw into rigid risers or directly into poly pipe.

# Pots & Baskets

## 4mm Fittings & Accessories

### 4MM THREAD JOINER

Screws into 4mm rigid risers and poly tube.

## Lawn Irrigation

Neta has a **diverse range** of Retail Ready irrigation products specifically designed for **turf and lawn care**. The range includes pop-up and impact sprinklers that have been designed to be hidden underground and water efficient at all times, while keeping **lawns green year round**. Neta sprinklers are a neat and effective way to provide an even spread of water to a lawn. They'll also save time - no more shifting sprinklers, no more hand held hoses.

### Spray head pop-up sprinklers

Spray head pop-up sprinklers for small to medium lawns. Water is sprayed out in various patterns and the nozzle can be rotated to align the pattern with the area being watered.

Available in 50mm & 100mm. Patterns available: Adjustable Arc, Narrow Strip, Centre Strip, 360°, 270°, 180°, 90° & 50mm body only. 1/2 inch female connecting thread.

### Shrub Adaptors

- Suitable for home & professional installations
- Vary reach by changing threaded riser height
- Creates a stable and durable installation
- For installations that require increased water flow
- Available patterns:
  - Adjustable Arc, 360°, 180°, 90°*
- Screw directly onto 1/2" Male BSP poly prop threaded risers
- Ideal for mature gardens
- Pre-assembled with nozzle & filter
- Removable filter for cleaning
- Made from UV stable materials

Adjust screw to increase/decrease water flow & throw

# Lawn Irrigation

## Sprinklers - 50mm Pop-Ups

Pop-up spray head rises 50mm for lawn watering. Ideal for small lawn areas. Connecting thread 1/2 " female.

Performance at 175kPa		
Pattern	Radius (m)	Flow (Lpm)
Adjustable Arc @full circle	3.5	8.5
Full Circle	3.5	10.0
3/4 Circle	3.5	7.5

Performance at 175kPa		
Pattern	Radius (m)	Flow (Lpm)
1/2 Circle	3.5	5.0
1/4 Circle	3.5	3.0
Centre Strip	1.1 x 8.0	5.0
Narrow Strip	1.1 x 8.0	5.0

**50MM POP-UP SPRINKLER ADJUSTABLE ARC**  
Adjustable throw radius up to 3.5m.

## Rural PE Pipe Compression Fittings & Tapping Saddles

### The Neta NupiGeco Story

Neta and NupiGeco have harnessed their extensive resources, expertise and experience to bring to Australia the Neta NupiGeco range of PE pipe compression fittings and tapping saddles.

Neta and NupiGeco's collective 'know-how', offers the expanding Australian polyethylene pipe market a new alternative for PE pipe fittings and tapping saddles at a level of service and on going customer support that will not let you down.

Manufactured to exact standards, using fully automated production systems and premium materials, the Neta NupiGeco Range of rural pipe fittings and tapping saddles have been specifically designed for the demanding Australian market and are ideal for use in the many diverse rural applications seen in stock watering and crop irrigation.

NupiGeco is a major, European manufacturer of pipe and fittings systems and commenced operations in Italy in the mid 1970's. On-going investment in research and development of both products and production systems allows NupiGeco to provide the highest quality products and service.

### Features:

- Easy conversion from Metric to Rural and back as the body of the fitting is interchangeable.
- The pipe ends do not need to be chamfered.
- All fittings are supplied individually barcoded for easy scanning.
- Body and nuts are manufactured from black UV stabilised virgin polypropylene for superior UV resistance.

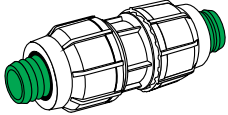

# Rural PE Pipe Compression Fittings

- Neta rural fittings are suitable for use with all rural pipe
- All male & female threads are BSP

2" x 50mm	PI/UKIT2	967596001	1	40

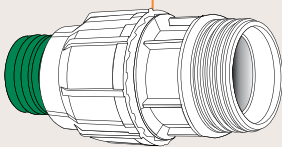

### WALL PLATE

SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY
1" Pipe x 3/4" F BSP	PI/UOT134	967597201	1	15

## Benefits

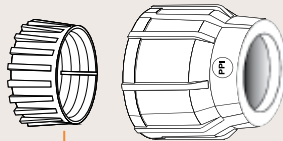

### 'long lasting'

Body, nut and insert tail constructed from virgin UV stabilised polypropylene.

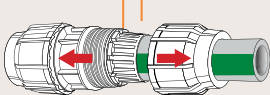

### 'won't leak'

Extra long insert tail with raised barbs ensure a leak proof connection on rural pipe.

### 'won't pull apart'

The tapered profile on the grip rings forces the hard sharp teeth into the pipe.

### 'easy to reuse'

Grip ring splits apart to enable the pipe to be removed easily. No more hassles when modifying pipe work.

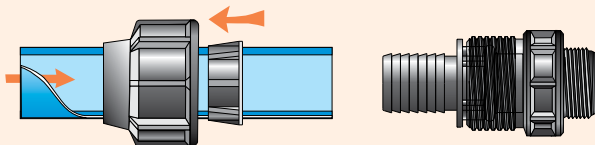

## Features

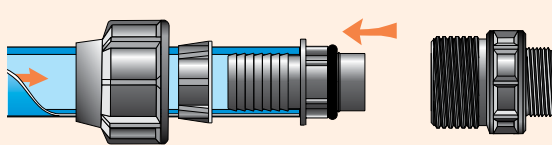

- Easy conversion from rural to metric and visa versa as the body of the fitting is interchangeable
- The pipe ends do not need to be chamfered
- All fittings are supplied individually barcoded for easy scanning

## Compression Fitting Installation:

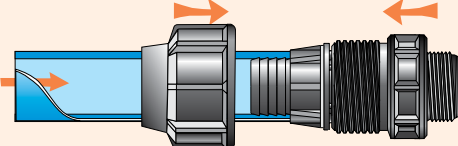

- 1** Cut the pipe square and clean. Unscrew the nut and grip ring and place over the pipe.

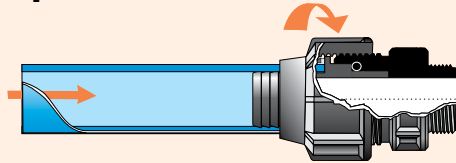

- 2** Remove the insert tail and push it into the end of the pipe.

- 3** Push the body over the insert tail and move the grip ring and nut up to the fitting.

- 4** Screw the nut tightly onto the fitting.

**Note:** Hand tighten fittings up to 1 1/4". Use a strap wrench on larger fittings.

# Rural PE Pipe Compression Fittings

## Tapping Saddles

- For use with rural pipe
- All threads are female BSP and come complete with stainless steel reinforcing ring (Grade 430)
- Grade 304 stainless steel bolts and nuts

### Materials

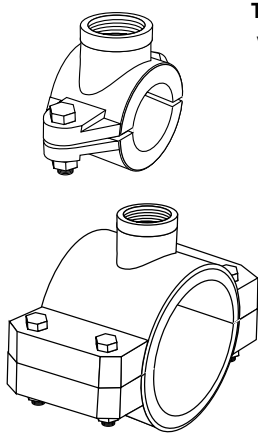

Virgin Polypropylene Body

### Pressure Rating

All sizes 800kPa

### Barcodes

All Neta rural tapping saddles are supplied individually barcoded for easy scanning.

**TAPPING SADDLES  
with Stainless Steel Bolts**

SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY
1" x 3/4" 2 bolts M8x40	PI/UPS134	967598001	1	100
1 1/4" x 1/2" 2 bolts M8x50	PI/UPS11412	967597801	1	70

2" x 3/4" 4 bolts M8x50	PI/UPS234	967598301	1	40

## Benefits

Constructed from virgin UV stabilised polypropylene.

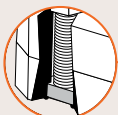

**'long lasting'**

Stainless steel reinforcing ring included on all threads.

**'positive thread'**

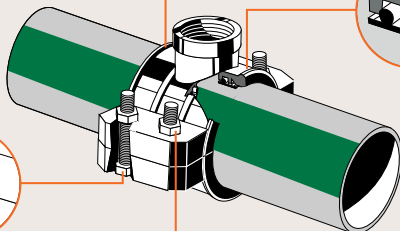

Gasket seal ensures a perfect seal. Very forgiving of out of round pipe and surface imperfections.

**'positive seal'**

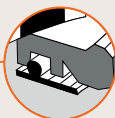

Easily assembled, bolts 'click-lock' into the body.

**'won't fall apart'**

Grade 304 stainless steel bolts suitable for underground use.

**'long lasting'**

## Features

- Durable construction from high grade polypropylene ensures long life, even under harsh conditions
- Stainless steel reinforcement rings on the branch off-take prevent threads from stretching
- Gasket seal provides a positive leak proof seal between the wall of the pipe and the tapping saddle

# nēta

## Metric Pipe Compression Fittings & Tapping Saddles

nupigeco

Manufactured to exact standards, using fully automated production systems and premium materials, the Neta NupiGeco Range of metric pipe fittings and tapping saddles is used globally in market segments such as plumbing, heating, water supply, gas, irrigation, chemical and petrochemical.

All products come with WaterMark certification to AS/NZS4129:2000. NupiGeco is a major, European manufacturer of pipe and fittings systems and commenced operations in Italy in the mid 1970's. On-going investment in research and development of both products and production systems allows NupiGeco to provide the highest quality products and service.

### Benefits:

Thrust ring and lip seal are pressure locked into the body and won't fall out during assembly, but remain easy to remove for cleaning or servicing.

**'won't fall apart'**

Thrust ring compresses the lip seal to compensate for scratches on the pipe surface and pipe ovality.

**'won't leak'**

All fittings supplied with black nuts for use with all pipe colours.

**'versatile'**

Production date code moulded into the body for traceability.

**'Quality assured'**

Lip seal – not just an 'O' ring. Allows for easy insertion of the pipe and improves seal performance. Foodsafe rubber (NBR).

**'won't leak'**

The tapered profile ensures a perfect mechanical seal on the piping system when the nut is tightened to the body.

**'won't pull apart'**

Grip ring splits apart for easy removal of the pipe. No more hassles in modifying pipe work.

**'easy to reuse'**

### Features

- All metric compression fittings have WaterMark product certification to AS/NZS4129:2000
- Meets the requirements for use in the plumbing and water supply markets
- All metric compression fittings have black nuts
- Versatile, suitable for use on PE pipe (AS/NZS4130) with various coloured stripes or jackets
- 'Lip seal' – not just an 'O' ring
- Improved sealing performance when used with scratched or out-of-round pipe
- Tapered grip ring profile ensures a perfect pipe to fitting mechanical seal – will not pull apart
- Lip seal allows for easier insertion of pipe into fitting
- Pipe ends do not need to be chamfered
- Grip rings split apart to enable removal from the pipe
- Hassle free fitting reuse when modifying pipe work

# Metric Tapping Saddles

## Tapping Saddles

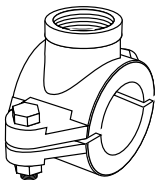

Neta Nupigeco metric tapping saddles have WaterMark product certification to AS/NZS4129:2000. This entails an independent audit of material selection, production and testing and is required for supply into the plumbing and water supply markets.

**Materials**  
Virgin Polypropylene Body

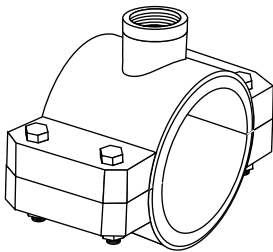

**Pressure Rating**  
25mm – 160mm (PN10)

### Benefits:

Constructed from virgin UV stabilised polypropylene.  
**'long lasting'**

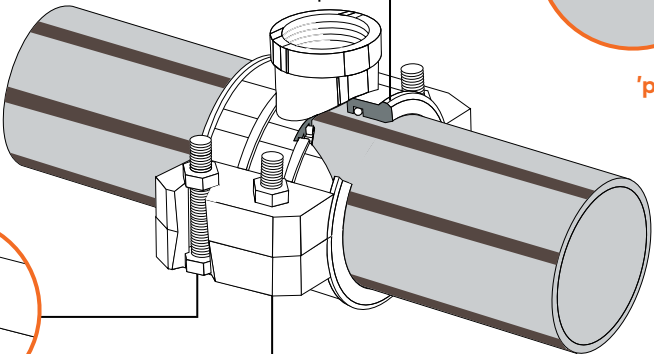

Stainless steel reinforcing ring included on all threads.  
**'positive thread'**

**'O' ring.**  
**'positive seal'**

Easily assembled, bolts 'click-lock' into the body.  
**'won't fall apart'**

Grade 304 stainless steel bolts suitable for underground use.  
**'long lasting'**

## Nylon Threaded Fittings

Neta's comprehensive range of Nylon Threaded Fittings are manufactured from glass filled nylon.

The BSP threads on this range of nipples, sockets, bushes, tees, elbows, plugs, caps, hose tails and tank inlets ensure a superior joint connection.

Nylon 6, 15% Glass filled provides excellent corrosion resistance at working pressures up to 1600kPa.

All Nylon Threaded Fittings are individually barcoded for easy scanning

### Maximum Working Pressure:

- Thread sizes 1/2" to 2" – 1600kPa (PN16) @20° C
- Thread sizes 3" & 4" – 1000kPa (PN10) @20° C

### Features:

- Made from tough virgin glass filled nylon (Nylon 6, 15% Glass filled)
- UV stabilised, will not break down in sunlight
- Tough threads, that won't distort
- Robust, strong and long lasting
- Superior joint sealing
- Non corrosive
- Meets the requirements for potable water quality AS/NZS 4020  
(Tests for analysing the suitability of products for use in contact with drinking water)

### Typical Applications:

- Plumbing, where AS/NZS4020 is a requirement
- Reliable substitute for threaded metal fittings
- High pressure piping systems
- Marine installations

## Polypropylene Threaded Fittings

Neta's extensive range of Polypropylene Threaded Fittings are manufactured from high grade polypropylene material. The BSP threads on this range of nipples, sockets, couplings, bushes, tees, elbows, plugs, caps and tank fittings allow for a secure joint connection.

Polypropylene provides excellent chemical and corrosion resistance at working pressures up to 1000kPa.

All Polypropylene Threaded Fittings are individually bar coded for easy scanning

### Maximum Working Pressure:

- Thread sizes 1/2" to 3" – 1000kPa (PN10) @20° C

### Features:

- Manufactured from a high grade polypropylene material
- UV stabilised, will not break down in sunlight
- Resistance to a broad range of chemicals (Refer ISO/TR 10358 – 1993)
- Non corrosive

### Typical Applications:

- Agricultural, commercial & urban irrigation systems
- Suitable for use in low pressure installations
- Marine installations

# Nylon Threaded Fittings

Made from a UV stabilised, glass filled nylon that is robust, strong and long-lasting. All fittings are individually barcoded for easy scanning.

## Materials

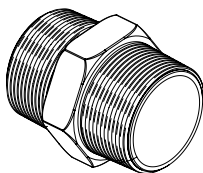

Nylon 6, 15% glass filled

## Pressure Rating

1/2" to 2" - 1600kPa (PN16)

3" to 4" - 1000kPa (PN10)

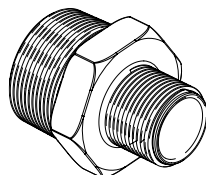

## Fittings

### NIPPLES (MxM)

Joins two female threaded components of the same size; ie valves to tees.

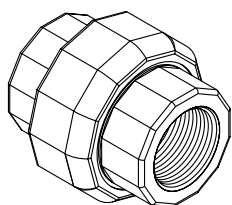

SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY

32mm barb x 1 1/4" BSP	PN/HT0032125	967457701	10	300

### INSTALLATION TIPS

- Use teflon tape or a sealant paste which is suitable for use on threads
- When using a sealant paste, care should be taken to prevent over-tightening of the fitting
- Sealant paste for use on threaded joints should be non-hardening and be suitable for use with plastics
- Align the fitting to the job to prevent the possibility of cross-threading
- Generally once the fitting is threaded to hand tight, then one to two extra turns is all that is normally required
- Do not over tighten

# Polypropylene Threaded Fittings

Made from high grade UV stabilised polypropylene material. These fittings are non-corrosive and resistant to a broad range of chemicals. All fittings are individually barcoded for easy scanning. Contact national sales on 1300 771 134 to discuss all your special project needs.

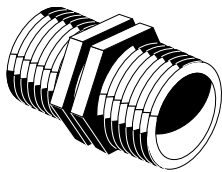

## Materials

Polypropylene

## Pressure Rating

1000kPa - (PN10)

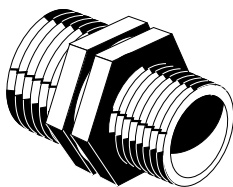

## Fittings

### NIPPLES (MxM)

Joins two female threaded components of the same size; ie valves to tees.

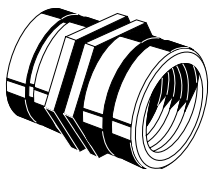

SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY
1/2" x 1/2"	PM/N00050000	967448901	20	360
3/4" x 3/4"	PM/N00075000	967449001	20	600
1" x 1"	PM/N00100000	967449101	20	300
1 1/4" x 1 1/4"	PM/N00125000	967449201	10	400
1 1/2" x 1 1/2"	PM/N00150000	967449301	10	300
2" x 2"	PM/N00200000	967449401	10	200

### REDUCING NIPPLES (MxM)

Joins a female threaded fitting to a female connection of a smaller size.

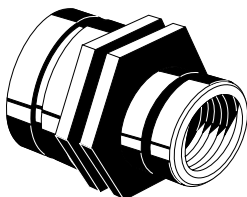

SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY
3/4" x 1/2"	PM/RN0075050	967450701	20	700
1" x 3/4"	PM/RN0100075	967450801	20	400
1 1/4" x 1"	PM/RN0125100	967450901	10	400
1 1/2" x 1"	PM/RN0150100	967451001	10	400
1 1/2" x 1 1/4"	PM/RN0150125	967451101	10	340
2" x 1 1/2"	PM/RN0200150	967451201	10	180

### SOCKETS (FxM)

Joins two male threaded components of the same size; ie threaded pipe lengths.

SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY
1/2" x 1/2"	PM/S00050000	967451801	20	400

# Threaded Risers

## For Extra Reach

Neta threaded risers come in a variety of lengths and sizes that extend the reach and coverage of sprinklers such as pop-ups, impact sprinklers and shrub head sprinklers.

Manufactured in Australia from strong and durable UV stabilised polypropylene, all threads are BSP and are compatible with other metal or plastic BSP fittings. The BSP threads are made to exacting standards, guaranteeing easy assembly.

THREADED RISERS	
SIZE	PRESSURE RATING
1/2"	1650kPa
3/4"	1650kPa
1"	1650kPa
1 1/4"	1700kPa
1 1/2"	1100kPa
2"	900kPa

### Features:

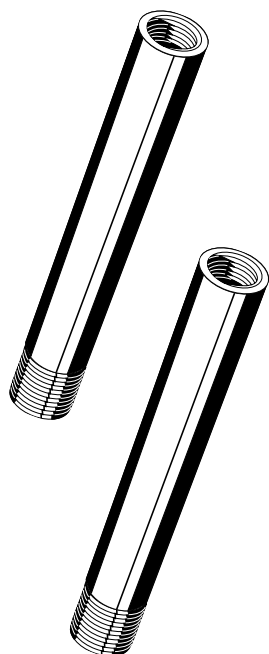

All risers are supplied with a barcode label to take advantage of scanning at the checkout register

Bundles or bags are labelled with a trade unit barcode to help with stock control

## Adaptors - Micro Spray & Micro Sprinklers

### MICRO SPRAY ADAPTOR (4MM X 1/2")

Enables 4mm micro sprays or sprinklers to be connected to the end of 1/2" male poly prop risers.

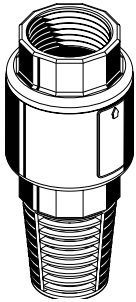

DESCRIPTION & SIZE	ARTICLE NUMBER	PART NUMBER	ORDER QTY	CTN QTY	PACK TYPE
4mm x 1/2" FBSP Micro Spray Adaptor	MR/RRMA04000	967482401	15	120	3/Consumer Pack - RR Box

### Shrub Adaptors Assemblies

- Install shrub adaptors on threaded risers for higher water flow applications.
- Suitable for home & professional installations
- Screw directly onto 1/2" Male BSP poly prop threaded risers
- Ideal for mature gardens
- Pre-assembled with nozzle & filters
- See page 100 for more details

# Valves

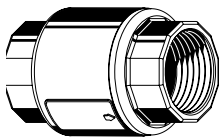

## Valves

### FOOT VALVES - Female BSP

Maximum Pressure 1600kPa (232 psi) @20°C Glass fibre reinforced nylon body, stainless steel spring, acetal plunger and nitrile rubber seals

# Azud Filtration

---

QUALITY CONVENTIONAL FILTRATION OPTION.  
AVAILABLE SIZES 3/4" TO 2" BSP.

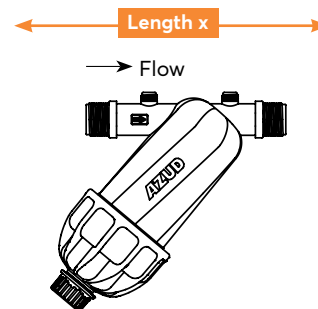

### Features and Benefits:

- Simple construction  
Body and cap with captured o-ring seal
- Durable and corrosion-resistant  
Filter body and discs, manufactured from uv stabilised polypropylene
- Easily disassembled for cleaning  
No tools required to remove the disc cartridge
- 130 micron disc element  
Higher filtration security to a similar sized screen filter
- Chemical resistant  
Suitable for use with fertiliser injection systems

### Typical Applications:

- Domestic & commercial micro irrigation systems
- Commercial drip irrigation systems
- Rural household pre-filtration
- Recycled water systems
- Control line protection

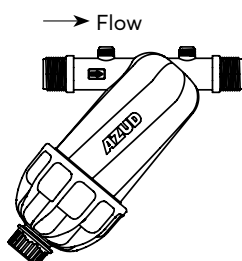

### Product Specifications & Dimensions:

Filter Size		Flow Rate (Lpm)	Maximum Pressure (kPa)	Surface Area (cm²)	Disc Replacement Guide			Length X
Inlet / Outlet					Cartridge Type	Dimensions		
BSP Thread	Disc Micron					Diameter (mm)	Length (mm)	(mm)
¾"	130 	50	800	180	¾" & 1"	48	156	185
1"	130 	67	800	180	¾" & 1"	48	156	190
1¼"	130 	138	800	300	1¼"	68	180	231
1½"	130 	270	800	525	1½" & 2"	90	225	231
2"	130 	383	800	525	1 ½" & 2"	90	225	270

Note: Clean water flow rate @20kPa head loss – 130 micron

Note: Screen filters cannot be used in disc filter housings (the flow direction is different)

Disc Filter

Disc Cartridge  
3/4" & 1"

Disc Cartridge  
1 1/4"

Disc Cartridge  
1 1/2" & 2"

## Azud Modular 100 Screen Filter Specifications

QUALITY CONVENTIONAL FILTRATION OPTION.  
AVAILABLE SIZES 3/4" TO 2" BSP.

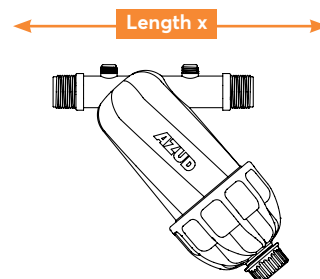

### Features and Benefits:

- Simple construction  
Body and cap with captured o-ring seal
- Inlet flow diffuser  
Evenly distributes water along the full length of the cartridge
- Easily disassembled for cleaning  
No tools required to remove the screen cartridge
- Range of screen mesh sizes and screen cartridge  
Filtration grades are tailored to suit individual application
- Drain valve (Optional)  
Allows partial screen flushing
- Chemical resistance  
Suitable for use with fertiliser injection systems
- Conform to ISO/DIS9912-1  
Filter element resistance to buckling and tearing

### Typical Applications:

- Domestic & commercial micro irrigation systems
- Rural household pre-filtration
- Recycled water systems
- Rainwater tanks

### Product Specifications & Dimensions:

Filter Size	Screen Mesh Sizes				Flow Rate (Lpm)	Maximum Pressure (kPa)	Surface Area (cm <sup>2</sup> )	Screen Replacement Guide			Length x
Inlet/Outlet								Cartridge Type	Dimensions		
BSP Thread	Stainless Steel								Diameter (mm)	Length (mm)	(mm)
¾"	n/a	 75	 120	 150	62	800	160	¾" & 1"	48	151	185
1"	n/a	 75	 120	 150	88	800	160	¾" & 1"	48	151	190
