

Product Data And Specifications

Draw Plunger Pumps

These are high quality heavy duty pumps, with the added advantages of having Raindrop Neoprene Pump Buckets and stainless steel sleeve valves together with stainless steel valve seats as standard.

The Raindrop Draw Plunger Pump should be used in bores of excess of 60m (200ft.) Valves and rods are made from the highest quality marine grade stainless steel, resulting in longer periods between maintenance. All rods are pinned to the cage providing extra security when withdrawing the complete plunger and bottom assemblies for servicing.

Pump Size	Size Piping/Casing Screwed For Suction	Discharge	Plunger Rod Screwed	Maximum O.D. Of Pump Top Cap	Stroke
70mm (2/ 3/4")	50mm (2") Female	80mm (3")	7/8" Whit	112mm 4 3/8"	460 18"
83mm (3/ 1/4")	50mm (2") Female	100 (4")	1" Whit	115mm 4 1/2"	610 24"
